ЗАМЕТКИ ПО БОЛГАРСКОЙ ЭТИМОЛОГИИ
(К СТАТЬЯМ «БОЛГАРСКОГО ЭТИМОЛОГИЧЕСКОГО СЛОВАРЯ»)

[Notes on Bulgarian Etymology
(as Found in the Etymological Dictionary of the Bulgarian Language)]

Abstract: The article proposes etymological explanations for some Bulgarian words, either alternative or supplementary to the explanations found in the *Etymological dictionary of the Bulgarian language*: Bulg. dial. *пълюшка* ‘first or last snow’ is hypothesized to be a derivative of PrSlav. **pylb*; dial. *сѣза, сѣзь* ‘thin layer of mold on wine or on pickled products’ are explained as a continuation of PrSlav. **soga*, a derivative of **segti*; dial. *снѹвам* ‘cover’ is tentatively explained as a version of Bulg. *снова* (PrSlav. **snuti, *snovŕ / *snujŕ*); *тѹмкам* ‘knock’ and *тѹмне ми* ‘figure (out)’ are regarded as genetically identical with Rus. *тѹмкать* ‘utter some sound’ and ‘figure (out)’ and Belarus. *тѹмкаць* ‘figure (out)’ (all of those being based on onomatopoeia).

Keywords: Bulgarian etymology, selective interslavic lexical connections.

ACKNOWLEDGEMENTS

Article written under the project “Lexical characteristics of the Slavic languages as a continuation of the proto-Slavic lexical system: word formation, semantic and etymological aspect lexical analysis” grant РФФИ № 19-012-00059
